

PATENT FUTURES: A HISTORY

“Patent Futures: A History,” is the fourth and final workshop of the ERC-funded project “Patents as Scientific Information, 1895-2020,” (www.passim.se) in collaboration with The International Society for the History and Theory of Intellectual Property (ISHTIP www.ishtip.org).

Dates: April 26-28, 2023.

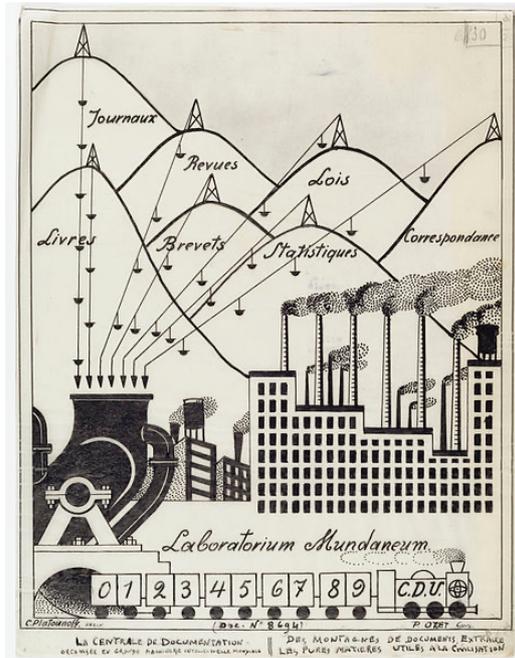

Venue: Mundaneum, Mons, Belgium.

Call closes: November 15, 2022.

Proposal format: 500 Word proposal/200 Word bio.

Submit to: 2023workshop@passim.se

Co-founded by the two Belgian lawyers Paul Otlet (1868-1944) and Henri LaFontaine (1854-1943),

Mundaneum <http://www.mundaneum.org>, has played a crucial role for PASSIM, both in terms of its structure and design, but also because it was here the project was first conceived. As PASSIM draws to a close, we return to “the scene of the crime” for a workshop on the past, present, and future of patents.

Patents tend to be associated with progress, modernity, and future usefulness. At the same time, we know that they are profoundly contextual, situated in specific historical eras and traditions. Time and various temporalities therefore occupy crucial points of departure when researching the history of patents. We now invite Ph.D. candidates or recent Ph.D.’s (degree awarded no earlier than during 2022) to submit proposals on topics that include but are not limited to: questions of memory and regimes of remembrance in the patent system; legal temporality in general, especially in relation to the construction of value and capital; efficiency and speed as elements of bureaucratic time inside the Patent Office. In line with Otlet and LaFontaine’s *Mundaneum* legacy and their visionary work on knowledge circulation, we also invite contributions that focus on the visualization of patents and knowledge in general. Finally, we encourage submissions that consider the various formats and temporalities of patent records and/or engage critically with the archives and sources of interdisciplinary patent scholarship.

PASSIM will cover the travel and accommodation cost of the selected participants. Come and meet the entire PASSIM team and our special invitees: David Pretel, Assistant Professor of History and Economic Institutions, Autonomous University of Madrid; Katarina Nordqvist, Associate Professor and Head of Section, Swedish Ministry of Education and Research. Follow us on @passimproject as we announce more invited commentators!

Any questions can be directed to the organizers of the workshop:

Jesper Alkarp jesper.alkarp@liu.se

Isabelle Strömstedt isabelle.stromstedt@liu.se

Johan Larson Lindal johan.larson.lindal@liu.se

PASSIM is funded by an ERC Advanced Investigator Grant (741095) to Professor Eva Hemmungs Wirtén, Linköping University, Sweden, and runs between 2017-2023. PASSIM focuses on the “openness” aspect of patents, considering their role as technoscientific documents in the history of information and intellectual property. For more information on the project and the team, send us an e-mail: contact@passim.se, follow us on twitter @passimproject or visit our website www.passim.se.
